Caltrans METS Quality Assurance and Source Inspection (QASI) & METS State Wide Oversight Contract (2019-2022)

S2 provided on-call Source Inspection for Caltrans METS. Our services includes representing METS as Material Reps for various Caltrans districts, provided specialized source inspection services for

- Precast Concrete plants, (requiring Precast Concrete Institute (PCI) level 2 and 3 certifications to inspect I Girders, Bulb Tees, Box Girders, Box Culverts, Pavement slabs, MSE panels etc
- Steel Fabrication shops (requiring American welding Society(AWS),Certified welding inspectors CWI) to inspect steel girder fabrications, light poles and Overhead Sign structures, Anchor Bolts etc.
- Coating inspections requiring NACE certifications
- Nondestructive testing (NDT) like UT, PT, MT inspections requiring ASNT level 2 certifications

Some of the Projects that we provided source inspections are

SR 91- Corridor Improvements
Mid Coast Corridor Transit Project
Devore interchange
SR 58 Kramer Junction Improvements
I-5 Alicia to Oso Parkway , Oso to El Toro Improvements (Seg 1, 2 and 3)

For METS Oversight we provided QMP and SIQMP reviews, conducted quarterly audits and reviewed monthly reports from various projects from Cities, local agencies and County projects. Our involvement is from obtaining permits all the way to project closeout to assure METS related work is performed according to approved QMP and SIQMP. Some of the oversight projects that we serviced are

SR 60/Archibald Avenue Interchange project
SR 210 Corridor Improvement (SBCTA)
Oso Parkway Bridge (County of Orange)
SR 94-Euclid Ave Interchange (City of San Diego)
Bella Terrace (City of Bakersfield)
SR14 – Rancho Vista Improvements (City of Palmdale)
