City of Long Beach, Construction Inspection for Civil Public Works Projects (2024)

S2 Engineering was the prime consultant for the City of Long Beach Construction Inspection for Civil Public Works Project. S2 provided on-call construction management and inspection services to the City of Long Beach Public Works Department. Construction activities that S2 inspected included:

- Paving of cross gutters, sidewalks, driveways, and curb and gutters.
- Jointed Plain Concrete Pavement (JPCP)
- ADA curb ramps,
- Hot Mix Asphalt (HMA)
- Grading
- Tree removal;
- Alley, Parkway, and Parking Lot improvements;
- Slurry sealing;
- Asphalt grinding;
- inspection of fiber optic cables installed by third parties; removal of existing streetlights; installation of streetlights; and SWPPP inspection.

Construction Management services entailed adherence to City of Long Beach, Caltrans, and Federal requirements; environmental compliance; coordination with residents and the public; resolution of claims related to the public or contractors; staged construction; traffic control; completion of quantity sheets and pay estimates. This project also required project procedure review, and Contractor schedule coordination for fabrication, inspection, delivery, and installation of equipment and materials fixtures. S2 also maintained complete and current records including, but not limited to, project contracts, drawings, and specifications, change orders, directives, project correspondence, revisions, progress photos, and testing and inspection reports. Other responsibilities entailed maintaining daily job site reports that recorded daily/weekly activities of workers, equipment in use, general activities completed and special occurrences.
